PVC BOARD CX-A	Release Date: 15.11.2022	

PVC CX-A is a board made of PVC (polyvinyl chloride) with recycled materials in co-extrusion technology. The PVC CX-A board consists of 3 layers ("sandwich" construction): two external layers A made of hard PVC and an internal layer B made of foamed PVC.

PVC CX-A boards are widely used in the advertising and furniture industry and as elements of bodies for specialist vehicles, housings for machines, devices, etc.

PVC CX-A boards can be processed using hand tools, power tools and CNC machines.

The features:

- ♻ Flame resistant
- ♻ Chemical and corrosion resistant
- ♻ Water resistant
- ♻ Impact resistance
- ♻ Perfect balance of stiffness and lightness

We are the only manufacturer in Europe that can make any size and thickness of boards.
